Statistical Algorithms

Agha, M. and Branker, D. S. AS 317—Maximum likelihood estimation and goodness-of-fit tests for mixtures of distributions 399
Branker, D. S. See under *Agha, M.*
Chan, G. and Wood, A. T. A. AS 312—An algorithm for simulating stationary Gaussian random fields 171

Chatamvelli, R. and Shanmugam R. AS 310—Computing the non-central beta distribution function 146
Donev, A. N. AS 313—An algorithm for the construction of crossover trials 288
García-Pérez, M. A. AS 320—Decomposing an integer N into all sets of J positive integer summands by simulation of dynamically varying nested DO loops 522
——Correction to algorithm AS 179: Enumeration of all permutations of multi-sets with fixed repetition numbers 182
Gee, L. See under *Hilton, J. F.*
González Carmona, A. See under *Gutiérrez Jáimez, R.*
Gutiérrez Jáimez, R., González Carmona, A. and Torres-Ruiz, F. AS 309—Estimation in multivariate log-normal diffusion processes with exogenous factors 140
Hilton, J. F. and Gee, L. AS 321—An exact Hollander bivariate symmetry test 533
Koval, J. J. AS 319—Variable metric function minimization 515
Mauricio, J. A. AS 311—The exact likelihood function of a vector autoregressive moving average model 157
McCann, M. H. See under *Moser, B. K.*
Mendoza-Blanco, J. R. and Tu, X. M. AS 315—An algorithm for sampling the degrees of freedom in Bayesian analysis of linear regressions with t-distributed errors 383
Moser, B. K. and McCann, M. H. AS 316—A Robbins–Monro-based sequential procedure 388
Payne, R. W. AS 314—Inversion of matrices with contents subject to modulo arithmetic 295
Pham-Gia, T. See under *Turkkan, N.*
Shanmugam, R. See under *Chatamvelli, R.*
Tiwari, R. C. and Yang, J. AS 318—An efficient recursive algorithm for computing the distribution function and non-centrality parameter of the non-central F-distribution 408
Torres Ruiz, F. See under *Gutiérrez Jáimez, R.*
Tu, X. M. See under *Mendoza-Blanco, J. R.*
Turkkan, N. and Pham-Gia, T. AS 308—Highest posterior density credible region and minimum area confidence region: the bivariate case 131
Wood, A. T. A. See under *Chan, G.*
Yang, J. See under *Tiwari, R. C.*
